It is the Nartist Canvas that allows us to revolutionize the system
Through art, to do good.

The Platform is a multicontest digital space. That easily enables participation in competitions, the sale of works and the relationships among the different participants.

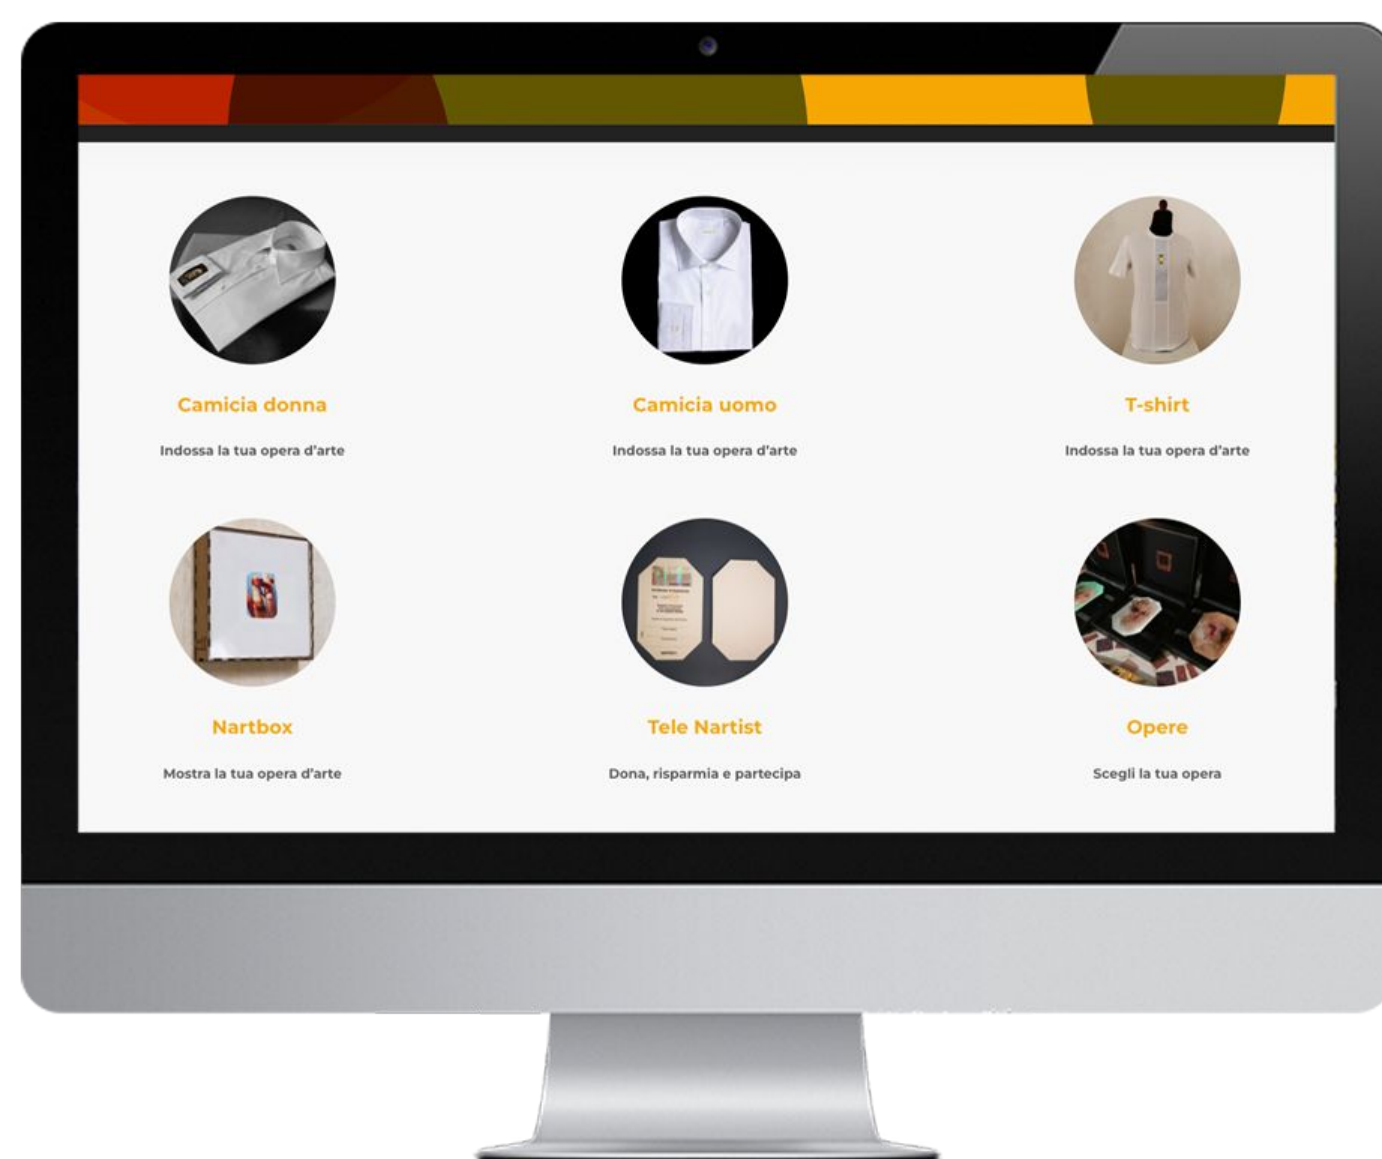

The Community, consisting of all **Artists, Ordinary Citizens, Nonprofits, Businesses and Institutions**, experiences the digital space by giving life to continuous relationships and interactions, receiving benefits, savings and opportunities.

We accompany artists and contest participants into the world of **NFTs** and **Blockchain** by tokenizing the artwork created.

We share the benefits with them and together we support social welfare.

Digital concept store featuring contest canvases, artwork and all products associated with the canvas.

Work in progress

In agreement with the Organizing Committee of the **Mediterranean Games** we will activate Competitions for Institutions and Companies from the **26 participating countries**, as early as February 2023.

The contests will be activated by all those companies that, would like to promote the sale of their product or service through a "social responsibility" action by promoting culture, art and solidarity.

The Contests will be in support of social projects in the areas of sports, environment, culture, humanitarian aid, etc.
